Professional Summary

Experienced Full Stack Java Developer with over 7 +years of expertise in designing and developing dynamic, scalable, and user-friendly web applications. Proficient in both frontend and backend technologies, with a strong focus on performance optimization, UI/UX, and Agile development practices.

- Proficient in **HTML5, CSS3, JavaScript, jQuery, React.js, Angular.js, and TypeScript**
- Expertise in responsive, dynamic, and cross-browser-compatible **UI/UX**
- Strong understanding of accessibility standards and best practices
- Skilled in **React state management, hooks, and component-based architecture**
- Experience in performance optimization (lazy loading, code splitting, minification)
- Strong proficiency in **Java, Spring Boot, Hibernate, and Spring MVC**
- Experienced in designing and developing **RESTful and GraphQL APIs**
- Skilled in microservices architecture and backend performance optimization
- Developed and deployed **e-commerce and CRM platforms**
- Hands-on experience with **WordPress, Joomla, and Salesforce** for content and customer management
- Delivered **robust, scalable functionalities** to enhance business efficiency and customer satisfaction
- Expertise in **JUnit, Mockito, Jasmine, and Selenium** for **testing and automation**
- Strong background in **unit testing, integration testing, and UI testing**
- Proficient in **Adobe Creative Suite, Figma, Adobe XD, and Sketch**
- Ability to translate wireframes into fully functional **UI/UX designs**
- Experienced in **Agile methodologies** (Scrum, Sprint Planning, Daily Standups, Retrospectives)
- Skilled in **Git, JIRA, Confluence, Visual Studio, R Studio, and IntelliJ IDEA**
- Provided technical mentorship to junior developers and offshore teams
- Fostered knowledge sharing and improved team productivity
- Specialized in code efficiency, **SEO best practices, and analytics tracking**
- Integrated **Google Analytics** to track user behavior and improve conversions
- Implemented best practices in coding, **UI/UX, and performance tuning**

- Passionate about **emerging technologies and continuous improvement**

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, jQuery, React.js, Angular.js, TypeScript

Backend: Java, Spring Boot, Spring MVC, Hibernate, Microservices

Database: MySQL, PostgreSQL, MongoDB

APIs: RESTful, GraphQL

State Management: Redux Toolkit, Context API

Testing & Automation: JUnit, Mockito, Jasmine, Selenium WebDriver, TestNG

Version Control: Git, Bitbucket, GitHub

Cloud & Deployment: AWS, Google Cloud, Azure, Docker, Kubernetes

CMS & CRM: WordPress, Joomla, Drupal, Salesforce

Project Management & Agile: JIRA, Confluence, Bugzilla, Mantis, TestRail, HP ALM

Design & UI/UX: Figma, Adobe XD, Sketch, Adobe Creative Suite

DevOps & CI/CD: Jenkins, CI/CD pipelines, Server Monitoring

SEO & Analytics: Google Analytics, SEO best practices

EXPERIENCE

Client: Browngreer PLC (Virginia)

Mar2024- Present

Role: Full- Stack Developer

Responsibilities:

- Designed a seamless claims management system using **React.js, Redux, and Tailwind CSS** for an intuitive user experience.
- Implemented state management using **Redux Toolkit** for efficient tracking of claim data and authentication.
- Built **RESTful APIs** with **Spring Boot, JPA/Hibernate, and PostgreSQL/MySQL** for secure data handling and scalability.
- Secured authentication and authorization using **Spring Security and JWT-based authentication**.
- Enabled role-based access control (**RBAC**) ensuring only authorized users can submit claims, and only admins can approve/reject them.
- Integrated file uploads with **AWS S3 or local server storage** for managing supporting documents.
- Utilized **Microsoft SQL Server** for managing claim records efficiently in an enterprise setting.

- **Implemented** real-time claim status tracking using **WebSockets** or polling mechanisms for instant updates.
- Deployed the backend on **AWS EC2/Heroku** and the frontend on **Netlify/AWS S3** for a scalable architecture.
- Developed complex **SQL queries**, stored procedures, and triggers in **Microsoft SQL Server** to enhance database operations.
- Automated **CI/CD pipelines** using **GitHub Actions/Jenkins** for smooth deployments.
- Optimized the **UI/UX** using **Tailwind CSS** for a mobile-friendly and visually appealing design.
- Integrated **third-party APIs** for **email/SMS notifications**, keeping users informed about claim status changes.
- Optimize performance using **lazy loading, memoization, and code splitting**.
- Develop **RESTful APIs** for handling policies, claims, payments, and user management.
- Implement **JWT/OAuth authentication** and role-based access control (**RBAC**) for secure user access.
- Design and manage a **scalable database schema** using **MongoDB/PostgreSQL**.
- Integrate **third-party APIs** (payment gateways, identity verification, and insurance databases).
- Develop and maintain business logic for premium calculations, claim processing, and **fraud detection**.
- Ensure **data integrity, security, and compliance** with industry standards.

Client: Marathon Petroleum Corporation (Findlay)

Mar.2023- Feb. 2024

Role: Full- Stack Developer

Responsibilities:

- Designed and developed a **full-stack web application** for managing fuel supply chain operations, including order management, live tracking, and analytics.
- Devised a responsive and accessible **UI/UX**, ensuring a seamless experience across desktop and mobile devices.
- Built the frontend using **React.js** with **Redux Toolkit** for state management and Tailwind CSS for a modern **UI/UX**.
- Developed a secure backend using **Spring Boot** with **RESTful APIs, Spring Security (JWT)** for authentication, and role-based access control.
- Implemented **real-time tracking** of fuel deliveries using WebSockets and push notifications.
- Structured and optimized database schemas using **PostgreSQL with JPA/Hibernate ORM** for efficient data handling.
- Integrated **CI/CD pipelines** using GitHub Actions for automated deployment on **AWS (EC2, RDS, S3)**.
- Enhanced system security by implementing **data encryption, API input validation**, and authentication mechanisms.
- Ensured accessibility by implementing semantic **HTML** tags, ARIA labels, and keyboard navigability, making the application accessible to users with disabilities.
- Developed interactive forms for order management and customer feedback, including validation, error handling, and real-time form updates.
- Created a dynamic, **responsive dashboard** for users to track fuel deliveries, order statuses, and analytics, with real-time updates powered by WebSockets, ensuring an up-to-date user experience.

- Created custom **UI components** such as data tables, charts, and forms to visualize fuel tracking, orders, and delivery analytics, improving user interaction and data accessibility.
- Improved system performance through **caching, database indexing, and API optimizations**, reducing response time by 30%.
- Led and mentored a team of junior developers in an **Agile environment**, utilizing **JIRA** for project tracking and conducting code reviews.
- Developed a notification system with email and SMS alerts for order updates and delivery confirmations.

Client: WEBSOC.AI (Hyderabad)

Sep.2020 - Dec.2022

Role: Full- Stack Developer/React JS

Responsibilities:

- Developed responsive web pages using **HTML, CSS, React, and TypeScript**, ensuring high-performance design and cross-browser compatibility.
- Integrated React components to improve **front-end** functionality and streamline user interactions, leading to a 30% increase in user engagement.
- Utilized **SEO best practices** to optimize web pages and improve site visibility, resulting in a 20% increase in organic traffic.
- Collaborated with designers using **Adobe Creative Suite** to ensure cohesive design execution, enhancing the overall **user experience**.
- Implemented state management using **React Hooks and Context API**, optimizing application performance and reducing load times.
- Integrated **CMS tools** such as **WordPress and Joomla** for dynamic content management, facilitating seamless updates and content creation.
- Participated in the development and deployment of **e-commerce systems** and **CRM platforms**, ensuring seamless integration with **Salesforce** and improving customer relationship management.
- Utilized **Google Analytics** to track user behavior and optimize conversion rates.
- Enhanced **user experience** through intuitive navigation and appealing visual design.
- Conducted **user testing** and iterated on designs based on feedback, resulting in increased user engagement.
- Created a responsive **e-commerce** application for a clothing management system using **React and TypeScript**, implementing reusable components for efficient development.
- Leveraged **React Hooks** for managing state and side effects, enhancing the app's performance and maintainability.
- Integrated **React Router** to enable smooth navigation between pages, ensuring a seamless user experience.
- Applied **TypeScript** for **type safety** and improved code quality, making the application more **robust** and easier to debug.
- Developed reusable and modular **React components**, reducing redundancy and improving the overall maintainability of the codebase.
- Created a dashboard interface using **React**, implementing **data visualization** components to display real-time energy usage effectively.
- Used **React Native** to explore potential cross-platform mobile app extensions, enabling broader accessibility for users on different devices.

- Integrated **TypeScript** to streamline development with type-checking, enhancing the reliability of the **front-end codebase**.
- Utilized **React Context API** for managing **global state**, ensuring **consistent data flow** across the **dashboard components**.
- Created a custom component library in **React** to **standardize UI elements**, ensuring consistency and ease of use across the dashboard interface.
- Explored the integration of **React Native** for potential **mobile app development**, ensuring cross-platform compatibility and a unified codebase.

Client: ECS Technologies (Vizag)

May 2018 - Aug 2020

Role: Junior Full- Stack Developer

Responsibilities:

- Developed a **LAMP (Linux, Apache, MySQL, PHP) web server** on **Raspberry Pi**, providing foundational experience in **web server deployment, data management, and server optimization**.
- Conducted performance tuning and optimization of **Apache, MySQL, and PHP** configurations to reduce response times and handle increased web traffic effectively.
- Utilized monitoring tools to track server **health and performance metrics**, proactively identifying and resolving issues to maintain high availability and reliability.
- Designed and implemented dynamic front-end interfaces using **HTML, CSS, JavaScript, and Angular.js**, ensuring an engaging and responsive user experience.
- Built and maintained **RESTful APIs** to facilitate communication between the front-end and back-end systems, ensuring scalability and seamless data flow.
- Integrated authentication and authorization features using technologies like **OAuth, JWT**, and custom role-based access controls to enhance security.
- Implemented database schemas and optimized queries in **Microsoft SQL Server** and **PostgreSQL** to manage complex data requirements and ensure efficient storage and retrieval.
- Developed and deployed full-stack applications, leveraging server-side technologies like **Node.js, Express, and PHP** for robust backend functionality, while utilizing **Angular.js** for dynamic front-end development.
- Automated testing processes using tools like **JUnit** for backend unit tests, **JMeter** for load and performance testing, and **Postman** for **API testing** to ensure high-quality, bug-free releases, optimal server performance, and reliable health monitoring.
- Deployed applications on cloud platforms like **AWS, Google Cloud, or Azure**, configuring **CI/CD pipelines** for continuous integration and deployment.
- Conducted usability and performance testing to ensure responsive designs and high-speed functionality across devices, ensuring optimal user experiences.
- Applied **Agile methodologies** and participated in sprints, standups, and code reviews to ensure timely delivery and foster collaborative team dynamics.
- Documented system architecture, **APIs**, and workflows to facilitate knowledge transfer, team collaboration, and maintainability.
- Developed and optimized **SQL queries** for efficient data retrieval, minimizing query execution time and improving overall application performance.

Client: ATOM Software solutions (Vizag)

Sept 2017 - Feb 2018

Role: Intern UI/UX Developer

Responsibilities:

- **Utilized Java** for application development, focusing on building intuitive user interfaces using Java frameworks to deliver responsive and dynamic salon shop services landing page and other related interfaces.
- Leveraged the Spring **Model-View-Controller (MVC)** framework to design and implement scalable and efficient server-side functionalities, enhancing overall application performance and user interaction for salon services.
- Designed user-centric data storage solutions by integrating relational databases like **MySQL** and executing database operations with **Java Database Connectivity (JDBC)** and **Hibernate Object-Relational Mapping (ORM)** to manage salon service bookings and client data.
- Collaborated with cross-functional teams to ensure alignment of back-end logic with front-end design principles, resulting in seamless user experiences for clients booking salon services online.
- Developed **wireframes and interactive prototypes** using tools like **Figma** and **Adobe XD**, providing visual blueprints for the design and ensuring alignment with the overall user journey.
- **Implemented a clean and intuitive layout**, prioritizing key service offerings, easy navigation, and fast access to the booking system, reducing user friction and increasing conversion rates.
- Focused on visual hierarchy and **clear calls-to-action (CTAs)**, making the process of booking services simple and effortless for users, thereby improving user engagement and satisfaction.
- Optimized the **landing page load time** and performance through efficient design practices and image optimization, ensuring a fast and smooth user experience for salon clients.
- Created **visually appealing and consistent branding** through color schemes, typography, and imagery, aligning the design with the salon's brand identity and conveying trust and professionalism.
- Designed **intuitive user flows** for booking services, ensuring users can easily navigate from selecting a service to confirming an appointment, reducing abandonment rates.
- **Iterated design concepts** based on user feedback and analytics, making data-driven decisions to continuously improve the overall user experience and ensure higher client retention.
- Designed and developed the **front-end**, ensuring the implemented UI matched the designed prototypes and adhered to best UX practices, maintaining design consistency across the platform.
- Integrated **animations and transitions** to enhance the user experience without overwhelming the user, providing visual feedback and improving interactivity.
- Conducted **A/B testing** on various design elements such as CTAs, layouts, and color schemes to determine which variations provided the best user experience and conversion rate.

EDUCATION

University of the Cumberlands (Williamsburg) Master's in Information Technologies

Andhra University (Vizag) Bachelor's in Computer Science and Engineering
